Trees geotagged at Gitam campus

TNN | Jan 19, 2023, 08.20 AM IST

Visakhapatnam: Trees and shrubs in the flat green area and inner fence of the sloppy stretch of Gitam campus have been geotagged. A database consisting of botanical and common names has been created and populated with detailed description, consisting of classification, distribution, habit, flowering, fruiting, economic importance and remarks along with photographs. Gitam school of architecture dean Prof Mohan K said they worked for the last three months on the project and successfully completed it by tagging around 130 tree species with QR codes. tnn
